#### REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the instant claims are allowable over the prior art of record, because the prior art is silent to a current collector comprising: a plurality of first radiating conductors radiating from a focal point on the frame and terminating at the frame perimeter; a first group of at least two concentric conductors being concentric with the focal point, and intersecting a plurality of radiating conductors; a second group of at least two second concentric conductors being concentric with the focal point, and intersecting a plurality of radiating conductors; wherein from the focal point to an outer most one of the first concentric conductors is a distance "x" and from the focal point to a nearest most one of the second concentric conductors is from 1x to about 10x, wherein there are no concentric conductors intermediate the outer most one of the first concentric conductors and the nearest most one of the second concentric conductors.

The prior art, such as Wackwitz U.S. Patent 1,044,831, teaches a current collector comprising a plurality of first radiating conductors radiating from a focal point on the frame, wherein the first group of concentric conductors intersect the radiating conductors. The reference is silent to a second group of concentric conductors, wherein there are no concentric conductors intermediate the outer most one of the first concentric conductors and the nearest most one of the second concentric conductors. Therefore, the subject invention is patentably distinct from Wackwitz.

*Conclusion*

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
